## Narratives

### Disaster Damage:

In 2017, communities that had not yet had a chance to fully recover from the 2015 and 2016 floods were impacted again. Hurricane Harvey, a regenerated tropical depression, made landfall on August 25, 2017, as a Category 4 hurricane, bringing with it extreme wind gusts and, in some places, up to 60 inches of rain in 5 days. The hurricane caused catastrophic flooding and at least 82 human fatalities, due in part to the weather system stalling over the Texas coast. The windspeeds recorded over South Texas may have been underestimated, especially near the coast and close to the eyewall of Hurricane Harvey, as many observation stations were disabled prior to landfall of the eye of the hurricane. However, a peak wind gust of 150 mph was reported near Rockport. Hurricane Harvey made landfall twice and is viewed by many as three separate events: the initial landfall in Aransas County; unprecedented rainfall in the Houston metroplex and surrounding areas; and the second landfall on August 29, 2017, in southeast Texas near the cities of Orange, Beaumont, and Port Arthur. These events caused not only wind damage, but also widespread flooding. The 49 CDBG-DR eligible counties affected by Hurricane Harvey cover 15 percent or 39,496 square miles of land area in the state and contain approximately 32 percent of the state's population. The land area affected is roughly the size of the state of the Kentucky. Nearly 8.9 million Texans live in the affected counties. By the time the rain stopped, Hurricane Harvey had dumped almost a year's worth of rainfall in just a few days. So much rain fell during the hurricane that the National Weather Service had to update the color charts on their graphics in order to effectively map it. Two additional shades of purple were added to represent rainfall totals for 20-30 inches and "greater than 30 inches" ranges.

### Recovery Needs:

Recognizing the state's long and well-documented history of flooding, hurricanes, wildfires, and droughts, as well as its ongoing efforts to mitigate future disaster effects in its most vulnerable areas, the GLO continues its commitment to rebuilding while prioritizing resiliency. In assessing unmet needs, it is important to consider the additional costs of safeguarding housing and community infrastructure investments from future disasters. As such, Texas will not only assess projects and consider state-run programs that replace or repair lost property but will also seek to invest resources in efforts that promise to mitigate damage from a wide range of future disaster types. Although this can increase costs initially, mitigating efforts can greatly reduce the cost of future damages. The success of this long-term recovery practice was seen firsthand during Hurricane Harvey. Resilient-enhanced projects from previous CDBG-DR efforts suffered less damage from Hurricane Harvey: construction projects designed to prevent future flooding, mitigate further loss, and decrease evacuation times. Single family home resiliency solutions are expected to add approximately 10 to 15 percent to the total cost per home; multifamily resiliency solutions add 15 to 20 percent to the total cost per project; and infrastructure resiliency solutions add 15 to 20 percent to the total cost per project. Resiliency solutions are varied and dependent on the respective area's Threat and Hazard Identification and Risk Assessment (THIRA). Single family home resiliency solutions may include elevating the first floor of habitable area; breakaway ground floor walls; reinforced roofs; storm shutters; use of ENERGY STAR appliances and fixtures; and mold and mildew resistant products. Multifamily resiliency solutions include elevation; retention basins; fire-safe landscaping; firewalls; and landscaped floodwalls. Buyout programs support hazard mitigation, floodplain management goals, and resiliency by removing homeowners from the floodplain, thus eliminating vulnerability to future flooding situations. After homes are purchased, the structures are demolished or relocated. The land reverts to a natural floodplain, converts into a retention area, or is retained as green space for recreational purposes. The buyout option serves multiple objectives and provides a resiliency option versus rebuilding within a floodplain. Buyouts help prevent repetitive loss and extreme risk to human health and safety. Buyouts conducted sooner rather than later prevent homeowners from making repairs and investing funds in properties that they then may not want to sell. In the case of infrastructure resiliency solutions, improvements may include:

- Elevating critical systems, facilities, and roadways above base flood elevation;
- Installing backup power generators for critical systems (water, sewer, etc.);
- Avoiding an increase in impervious cover by keeping projects in their original footprint and encouraging the use of building

practices that allow for more pervious coverage, when possible;

- Replanting with only native vegetation to preserve the natural environment;
- Installing retention basins, larger culverts and debris guards, erosion control solutions, and back-up communication systems; and
- Supporting local community efforts to enhance building codes and regulations

The resiliency multiplier will be a standard 15 percent for both housing and infrastructure activities to calculate unmet need, as has previously been applied in other Texas CDBG-DR programs.

## Overall Progress Narrative:

### OVERALL NARRATIVE

During the quarter, the Harris County Affordable Rental project and Buyout projects had a substantial increase in draws as these programs near the end of the contract term and prepare for closeout. The state-ran Affordable Rental Program has completed all construction projects and are in the closeout and leasing phase with the expectation for the beneficiaries to be reported in the coming quarters.

### GLO Affordable Rental Program

Every project in the Harvey \$57m allocation portfolio for the Affordable Rental Program is now complete. The long-term compliance team under the ARP umbrella continues to work with our vendor on building out reporting capabilities to accurately reflect renter and tenant demographic data on an annual basis and DRGR will begin reporting direct benefits at the end of 2023 Q4 for this allocation.

### Harris County Voluntary Buyout Program

To date, Harris County closed on all thirty-seven (37) voluntary buyout projects. The program is in the closeout phase and the County is submitting the final expenditures associated with the program.

**Harris County Mandatory Buyout Program**

To date, Harris County has closed on eleven (11) buyout properties and demolition is complete. Of the thirty-one (31) owner and tenant households to relocate, thirty (30) households have relocated and the relocation expenditures are pending submittal to the GLO. One (1) household is searching for a replacement home. In Quarter 3 2023, the County posted one (1) newsletter in English/ Spanish on its Recovery website regarding relocation assistance and homes available through the Single Family New Construction Program. The Mandatory Buyout Program is in the closeout phase and the County is submitting the final expenditures associated with the program.

**Harris County - Affordable Rental Supplemental Program**

One affordable rental project (Richcrest Apartments) is construction complete and is in the close out phase. Of the project's two hundred eighty-eight (288) units, two hundred eighty-six (286) units are leased to LMI households. These households are expected to be reported in the coming quarters.

**Planning**

No projects are currently being funded by this allocation. Expenditures are related to state costs and for vendor translation services.

**Activity Description:**

Harris County will offer buyout assistance under the voluntary buyout program for residential properties in the Rio Villa target area. Assistance will be provided to property owners who are located in the target area and who agree to relocate to areas of reduced flood risk. This will be considered an area benefit as the County has designated target areas to buyout repetitively flooded properties and to use these areas as green/open space for flood control structures and water retention areas. These activities will meet the low to moderate income national objective.
